

Instructions for MAC downloads:

1. Pay for download and follow instructions for download.
2. When you push the download button on the bottom of the BoatLanes page you will notice the file "Matrix" has downloaded into the MAC download window on your desktop.
3. Close Safari and the MAC download window.
4. Open Finder.
5. Open Downloads folder.
6. Notice the BoatLanes file is there.
7. Insert an MMC card into your SD/MMC card device/card slot.
8. Connect your SD/MMC card device into a USB slot if using an external.
9. A "No Name" folder will appear on your desktop, this is your SD/MMC card device icon.
10. Move your mouse over the BoatLanes file.
11. Hold down the right mouse button and drag the file over the "No Name" folder.
12. Release the right mouse button.
13. The BoatLanes file is now on your MMC card.
14. Follow instructions from BoatLanes for loading into your GPS unit.
